

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name chathena
Your Name Cheryl Dennis
Your Team Member's Name Athena Kianmehr

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Iteration 1A
 - Iteration 2A
 - Worked collaboratively with partner on all of Iteration 3

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Iteration 1B
 - Iteration 2B
 - Worked collaboratively with me on all of Iteration 3

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

I enjoyed my experience working with my partner and I believe we split the work up effectively. I liked how we were able to work independently on the subparts of each iteration and come together to merge our work to move on to the iterations. One thing that we found difficulty with was pulling and pushing our code onto github, which hindered how easy our collaboration could be and resulted us in working on one laptop for a certain time until we were able to figure it out. Other than that, the collaborative experience went well.
