

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Chathena

Your Name Athena Kianmehr

Your Team Member's Name Cheryl Dennis

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Iteration 1B
 - Iteration 2B
 - Worked on iteration 3 together
2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Iteration 1A
 - Iteration 2A
 - Worked on iteration 3 together
3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

It was helpful to double-check everything with someone else and see the different ways people understand and implement logic. The only challenge was sharing the changes made to the project. It would have been much easier if the changes could be dynamically observed, as working with VS Code often caused issues with pushing and pulling the code. This sometimes resulted in having to merge two existing code files, which added complexity.
